Learning Awaits

Coaching

Staff

Teachers need support as they shift to this new world of teaching and communicating with students and families. Work with a coach that has made the shift from teaching in the classroom to teaching online. Discuss workflows, grading, personalizing assignments, and how to care for the whole student in a virtual setting

Students/Guardians

As more and more families are moving to online learning, they are eager and apprehensive about the shift. An online learning coach can work directly with students and parents on ways to be successful as they make this shift. The coach can act as a bridge between school and families as they find their way in the virtual learning environment.

Administrators

Discuss ways to coach staff virtually, look at modeled workflows, and evaluation tools. Explore ways to harbor your online community and build long last teams regardless of geographic locations.

PERSONALIZED SOLUTIONS:

Everyone who interacts with a student is part of their learning team. Put the student at the center of all that you do - together - to nurture the whole student. Personalizations can take shape in the way a student communicates with team members, schedules their day, or shows mastery of learning objectives. Let's give everyone the tools they need to be successful.
